MOON RANGER

I. INTRODUCTION

Our beautiful moon, the spotlight of romantic evenings, the subject of ancient myths, the summoner of creatures of the night, is home to an evil secret. Long ago an alien civilization placed a gigantic dormant space craft on its surface. This space craft was programmed to harvest the valuable elements of our solar system. Unfortunately, this process will result in the total destruction of the Earth. To uproot the alien forces on one of Earth's most valued celestial assets, a hero is called for. That hero is ..MOON RANGER.

III. GAME PLAY

Moon Ranger's ultimate goal is to destroy the Element Converter on the moon surface. You must first locate four (4) pieces of the all powerful Gamma Bomb. Then you must get into the center of the base, and fight through countless aliens and robots. If you finally make it through this onslaught, the giant guardian robot awaits you. Destroy him and drop the bomb, but get out before it detonates. You must be at least one hundred thousand (100,000) miles away from the moon's surface when this bomb detonates. Any closer and you're done for !

IV. EQUIPMENTS

Fortunately, you have three state of the art Moon Ranger issued equipments. They are

I. MRATV

This stands for MOON RANGER ALL TERRAIN VEHICLE, a well shielded transformable vehicle capable of withstanding four to five high powered strikes! It can fly through any atmosphere or vacuum.

It comes complete with compressed zeon gas boosters on the bottom to spring over any sudden obstacles.

II. POWER SUIT

This is a state of the art BPS or Body Protection Suit. It comes equipped with an energy scattering system to dissipate any energy striking it, so as to lessen the impact onto your body. The boots contain compressed argon gas so that you can jump over, or on to objects at a great distance.

IV. EQUIPMENTS (continue)

III. WEAPON SYSTEMS

Your MRATV starts off with a high-powered plasma bolt which unfortunately, doesn't do much against the superior alien armor. However, you can pick up more effective alien equipments along the way. Your basic Moon Ranger gear includes the new ADAPTO (TM) hardware. This hardware can analyze the alien's equipment and adapt it into yours.

Here is a list of the known alien equipments. Some of the information on certain weapon systems is sketchy, so you will have to experiment with some of them.

1. PLASMA BOLT: Standard equipment on the MRATV with straight firing high powered plasma energy capable of penetrating any earthly material.
2. WAVE RIDER: Travels in a wave like fashion.
3. PLUS SHOT: Travels in a looping fashion, very powerful.
4. LIGHTENING BLAST: Very fast movement and reloading time. This weapon has the ability to freeze your opponent.
5. FLAM: Travels somewhat like a boomerang and inflicts a lot of damage.
6. IT: The most powerful of the aliens' weapons. Unfortunately, it only lasts a short time.

V. SPECIAL OBJECTS

Each new life begins with a four or five hit shield and a straight line plasma bolt. To get other capabilities you must retrieve them from heavily guarded enemy positions. A few of which are needed to complete your mission. They are...

1. Energy Cores: These only appear in the space levels after you destroy an enemy alien or space craft. This will partially recharge your MSATV shield banks.
2. Health Potions : These are only found in the asteroid and lunar bases. These will partially recharge your suit's armor.
3. Bomb Parts : You must locate all four (4) pieces of the Gamma Bomb before you can go to the moon to destroy the alien's Element Converter. To see what pieces you need press the SELECT button.

VI. LEVELS

There are several levels (worlds) that you must complete to master the Moon Ranger game.

- LEVEL 1: SPACE LEVEL #1: Launching from the space station, you must battle through the alien's first tough line of defenses.
- LEVEL 2: ASTEROID BASE #1: Disembarking from the MRATV, you set out on foot into this well guarded base in search of the 1st piece of the Gamma Bomb.
- LEVEL 3: SPACE LEVEL #2: The alien's second level of defense. Watch out for the cloning attack craft.
- LEVEL 4: ASTEROID BASE #2: Now enter this large base in search of the second and maybe the third piece of the Gamma Bomb.
- LEVEL 5: SPACE LEVEL #3: They'll throw everything they have at you.
- LEVEL 6: LUNAR SURFACE: The last level outside the moon base with tough alien defenses.
- LEVEL 7: MOONBASE: Watch out for the guards.
- LEVEL 8: FINAL CONFLICT ALIEN CONTROL CENTER: Destroy the Master Control Center.

VII. ENEMIES

Space Level Enemies

CLAWING: A big space cruiser with a homing device. Watch out for this one!

EYES: These are very dangerous. They home in and shoot at you.

FROG BUBBLE: This is a very dangerous enemy. They launch lots of little tracking frogs.

VII. ENEMIES (cont.) Lunar Surface Enemies

BOTS: These are destructive robots. They have incredible springs in their legs which allow them to leap great distances while they are shooting at you.

SPACE CRAB: Watch out for this monster. It is a half metallic and half organic cyborg. This one is very mean and very strong.

BULB MONSTER: This machine has the ability to make mechanical clones of itself. It will home in on you and explode.

VII. ENEMIES (cont.) Asteroid Level Enemies

FACES OF DEATH: These are actual aliens that control the asteroid complex. DO NOT, repeat DO NOT, come in physical contact with one of these creatures. One touch and it's instant death.

HAMMERS: Homing machines which when destroyed emit smaller versions of themselves.

BLINKYS: Weird enemies which can home in on your body heat. They have very strong blaster weapons.

HINTS AND TIPS

SPACE LEVELS

1. Don't bother killing the little space frogs. Kick them once and they will run away from you. Then concentrate on the FROG BUBBLE. This will keep launching the space frogs until you kill it.
2. Use your Turbo when there are a lot of aliens on the screen. This will allow you to zip around behind them and kill 'em.
3. At the end of the level, concentrate on the Clawing. He is the boss of the level and avoid the eyes.

ASTEROID BASE LEVELS

1. Don't bother with the health at the top of the screen on the first room, unless you really need it. You will usually lose a life trying to get it.
2. To find the first bomb piece, go out the right side door of the 1st room and down through the left doorway. You will see the bomb piece at the top of the screen.

LUNAR SURFACE

1. Let the leaping robots jump over you. Then jump up behind them and shoot.
2. Try to avoid most things on the surface since they are very hard to destroy.

NOON BARRI

1. Go straight after the Faces of Death. If you don't, they will keep launching tons of Baby Faces four at a time.
2. To kill the spinning prop monsters, stand in one place and wait for them to fly by you. When they do, take a shot at them. Keep doing this until all are dead.
